

KENSON ASSURED CERTIFICATE IN OIL AND GAS REFINEMENT (ADVANCE) (INSTRUMENTATION TECHNICIAN)

VI. Overview

The **Kenson Assured Certificate in Oil and Gas Refinement (Advance) (Instrumentation Technician)** focuses on the development of the underlying principles and practical skills required in the oil and gas industry.

The qualification is designed to deliver a high level of occupational capability and provide a sound foundation for progression.

The qualification meets the needs of learners who work or desire to work in the oil and gas industry and provides a broad background of understanding of the oil and gas industry and the practical skills and knowledge required.

VII. Entry Requirements

To gain entry into this programme the candidate is required to have:

- Five (5) CXC subjects, inclusive of Mathematics and Science (Chemistry, Physics or Integrated Science) or a postsecondary Technician's Diploma from an approved postsecondary education.
- If the student does not have the required Mathematics or Science subjects, KSPTL shall offer Mathematics and Science Bridging programmes to ensure students attain the necessary academic requiem to pursue the programme. **OR**
- Mature Entry Route: Candidate required to be 21 years or older, having two or more years relevant work experience as well as General Certificate of Education (GCE) Ordinary Level (or equivalent High School qualification) Maths and English.

VIII. Aims

The aim of this programme is provide an extensive background and understanding of the oil and gas industry and the practical skills and knowledge required to operate in the industry.

IX. Course Content

Some of the units to be delivered include:

- KIMT 110 - Instrumentation Theory Fundamentals
- KIMT 120 - Hand Over Processes
- KIMT 130 - Workplace Restoration
- KIMT 140 - Risk Minimization and Reduction
- KIMT 150 - HSE practices and procedures
- KIMT 160 - Effective Workplace Communication
- KIMT 170 - Preparation for the Job Maintenance
- KIMT 210 - Instrumentation Maintenance Procedures
- KIMT 220 - Assessments on Instrumentation plant and equipment
- KIMT 230 - Fault Finding Analysis on Instrumentation Equipment

X. Instructional Techniques

The instructional techniques include: video presentations and case studies, review exercise, field trips, instructor and student-led discussions, lectures, question and answer sessions, worksheet exercise and simulated production/operation activities.
